Uncover deep hidden treasures with the new **IMPACT** Multi Frequency Metal Detector by Nokta & Makro! The **IMPACT** combines multiple detectors in one and utilizes cutting edge technology, enabling a unique yet easy - to - use detector experience for new to experienced detectorists.

The **IMPACT** boasts (12) search modes designed to hunt out different targets such as coins, relics and deep treasure caches. It also operates extremely well in different terrains including (but not limited to) wet beach sand and parks, allowing you to search without any further adjustment if you wish.

Featuring (3) powerful operating frequencies, online firmware update (via PC USB) capability and robust design. If you are looking for depth and advanced discrimination ability, the **IMPACT** - just like its name - will make a great impact on your future detecting finds.

12 Search Modes

Multi Frequency
5kHz - 14kHz - 20kHz

Online Firmware Update Capability

Easy to use single menu design

12 Search Modes
2 Non-motion Modes (with audio discrimination)
2 All Metal Modes (with audio discrimination)
8 Discrimination Modes - 2 Tone / 3 Tone / 4 Tones / 99 Tones / Deep / Conductive Ground / VLX1 and VLX2

Ground Balance with 3 Options:
Automatic, Manual, Tracking

Notch Filter
Discriminates single or multiple Target IDs of unwanted metals by silencing them or producing an iron tone.

Tone Break
Adjusts the break points of the target response tones on the Target ID range.

Iron Audio (Fe Vol.)
Turns off or adjusts the volume of the low iron tone.

Audio Tone
Changes the frequency of target and threshold tones (150Hz - 700Hz).

iSAT
Allows for a stable operation of the device by eliminating false signals caused by high mineralization and hot rocks in the all metal and discrimination modes as well as eliminating threshold drifts caused by ground and temperature changes in the static modes.

Magnetic Mineralization Indicator
Shows mineralization intensity of the ground.

Extra features at the push of a button:
Audio Boost, ID Normalization, Target ID Depth Level.

Backlight (Bright.)

FD / Save

Easily saves your settings or restores factory defaults.
